

Circle Week — Electronics Deal Days

Test-vs-control read on the 13-week Electronics promotion across 60 stores. Difference-in-differences design, validated with a placebo check.

●

NET INCREMENTAL LIFT

+14.9%

vs. control stores, post-promo

INCREMENTAL REVENUE

\$917K

Test stores, 13-wk post period

SAMPLE

28 / 32

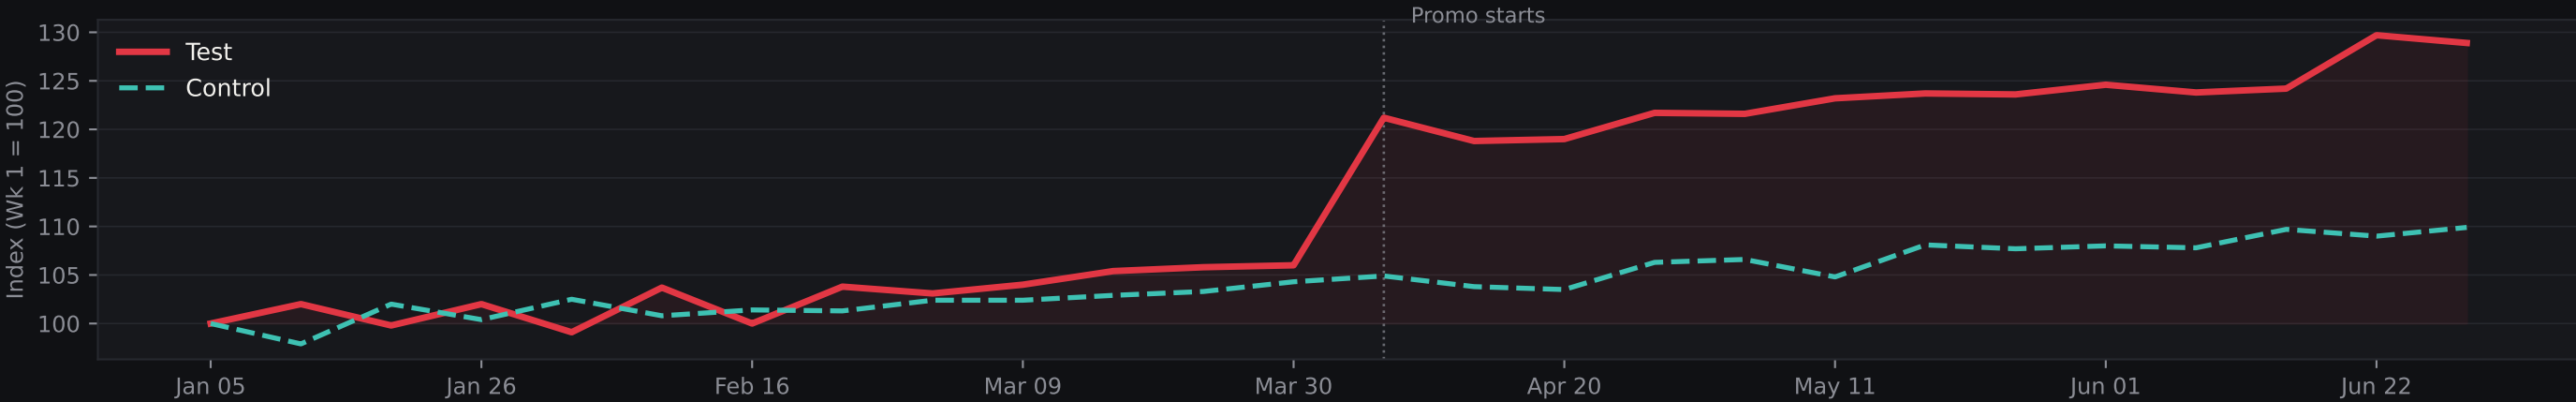

Test / Control stores

SIGNIFICANCE

p < 0.000001

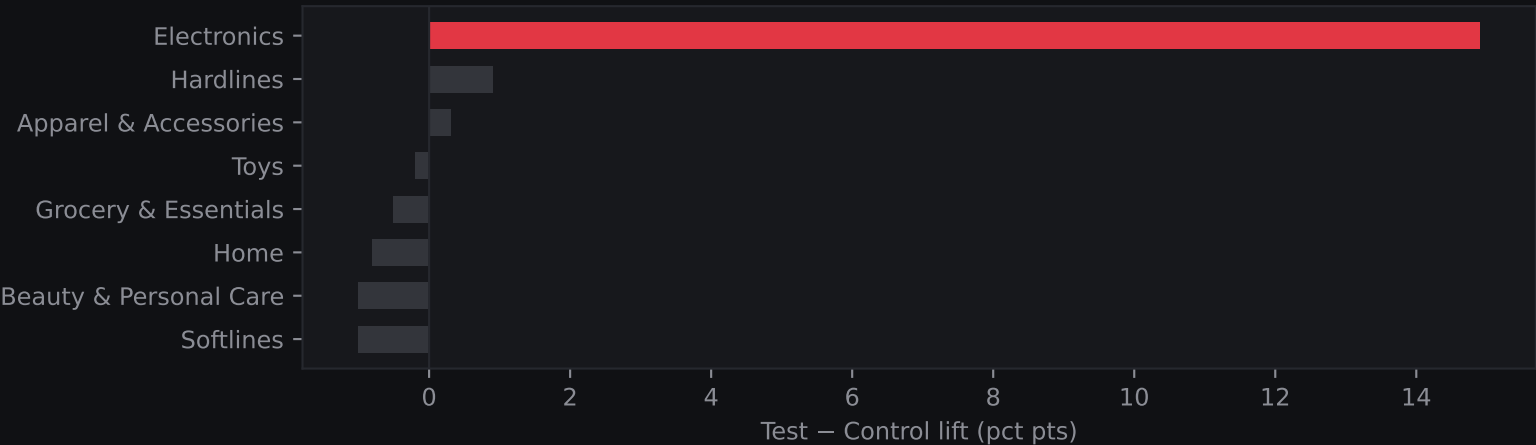

● SIGNIFICANT (95% CI)

Weekly revenue index — Electronics (Week 1 = 100)

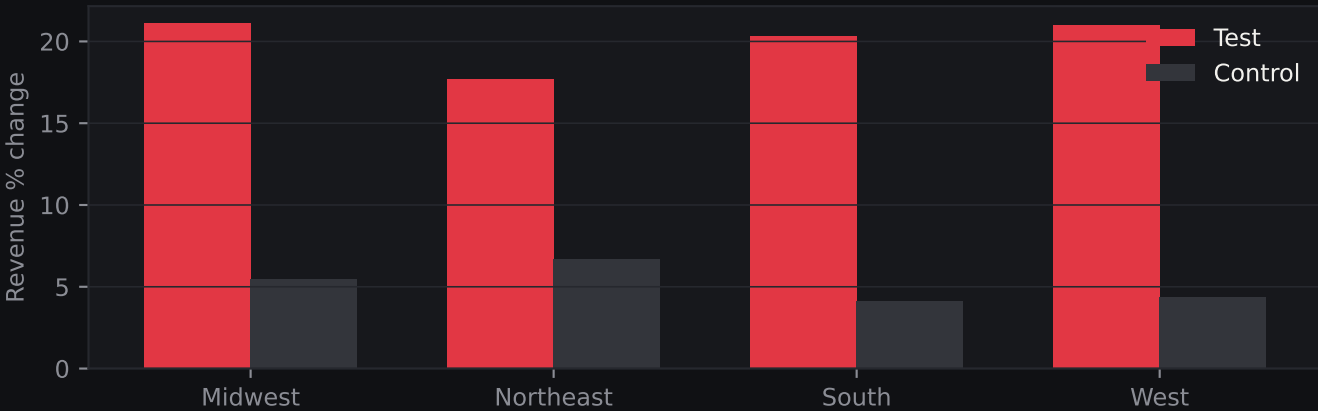

Lines track together pre-promo, then diverge after week 14 — the signature of a real treatment effect.

Lift is isolated to Electronics

Placebo check across all 8 categories — no spillover effect elsewhere.

Lift holds across every region

Test vs. Control, average store % change pre→post.

Top 5 test stores by lift

STORE	REGION	LIFT
T1022	West	+26.8%
T1037	Midwest	+25.6%
T1045	West	+24.3%
T1054	South	+23.0%
T1004	Northeast	+22.6%

METHOD

Difference-in-differences on store-clustered weekly revenue (13 wks pre / 13 wks post), 28 test vs 32 control stores, randomized at store level. Placebo test on non-Electronics categories confirms no spillover effect.
